

F1 2019 is the first game in the popular game series to be released on the PS5 and Xbox One consoles. You can customize your racing team with a set of new realistic liveries, third-party parts, and 25 classic F1 cars from various eras of Formula 1 history. Get your "hands on" experience before its release with our pre-release demo available now! ##Hook: Be a part of Formula 1's past & future! Play an early build of our full release F1 2019 Anniversary Edition today! Play free from 06/08 - 08/14 at [www.playformula1.com](http://www.playformula1.com) F1 2019 is an upcoming motor vehicle racing video game developed by Codemasters. It is due to be released on 24 August 2019 for Microsoft Windows, PlayStation 4 and Xbox One. It will be the first game in the "Formula One" series to release for eighth-generation consoles, and the first since F1 2015 in November 2018. The game will feature the full FIA Formula One World Championship season, along with all eleven teams and twenty-five drivers competing in the season, including new team Force India. The game will also feature all twenty circuits that are due to be raced in the season. The title was announced on 22 April 2019 after previously being teased by Codemasters on 10 March 2019. F1 2019 will be released for the PlayStation 4 and Xbox One on 24 August. The game will be released for the Nintendo Switch on 12 November 2019. In stark contrast to previous games in the F1 series, F1 2018 and F1 2017, only ten teams and twenty drivers are included in this year's instalment. This is due to a change from Codemasters' previous strategy of including every team and driver competing in a season of Formula One, which has been following since 2005's "Grand Prix Legends" and continued into later installments, including this year's "F1 2018". Codemasters have stated that they are aiming to include more teams and drivers in future games, which they intend to do by the end of the 2019 season. The game received "mixed" reviews, according to video game review aggregator Metacritic. Reviewers noted that the game features a higher quality of graphics than previous installments in the series, while also drawing criticism for apparent bugs and other problems in major gameplay systems present in this year's installment. "Polygon's staff described the game as "a significant step up", stating that "F1 2019 has improved greatly over last year's F1. Key elements like engine sounds are notably improved". "PC Gamer" staff praised the game's introduction of several new gameplay mechanics, including junior series championships, in-car "push to pass" boost functions and the ability for players to predict weather conditions. However, they also stated that it is "saddled with some rough edges that need smoothing out". "GameSpot's staff commented that the game has "some unusual bugs and design missteps", while praising its graphical realism and stating that it "does a lot of things right". However, they noted that the game's artificial intelligence is not up to par with previous titles in the series.
